

Dear Partner in Legislation:

Historically, school food service chapters in California host events to raise money to support their legislative efforts. Each year we send delegates to Washington D.C. and Sacramento to meet with legislators to represent our members by voicing issues that support child nutrition. Our Statement of Purpose:

"We believe money should be raised to completely cover the cost of the delegates' expenses and other costs incurred to support our legislative efforts at the state and federal levels, and the amount will be determined in advance and fund raising efforts will be determined accordingly. It is our commitment to use legislative funds appropriately, effectively and efficiently."

Therefore, we believe that the number of delegates our chapter sends to Washington D.C. should represent our entire region. Industry members have supported CSNA legislative efforts for years and our hope is that they will continue to do so. It is apparent that having a political voice is necessary to continue the quality and efficiency of our programs and inform legislators of the important role we play in children's health and education.

The Mother Lode Chapter appreciates your support in funding our legislative efforts. Our membership includes school districts from the Sacramento and San Joaquin Valley and throughout the foothill and Tahoe mountain area. We enjoy spending the day with our industry and school nutrition members and look forward to this annual event. Please join us on Friday May 15th.
