Do you know why and how a refrigerator delivers cold air?

We will show you.

We will explain the ins and outs of refrigeration. A factory tour will show you how it is made and the various components that go into building a high quality refrigerator or freezer.

We will go over proper maintenance and give you guidelines for purchasing product along with the proper electrical requirements.

We will cover which fruits and vegetables are compatible with one another and their proper location in both reach in and walk in refrigerators.

Cambro Mfg. will show you how selecting the best storage for specific fruits and vegetables will ensure freshness and attain maximum shelf life.
